Applied Behavior Analysis (ABA) Early Childhood to Adolescent Services

Uses evidence-based strategies to teach new and adaptive skills and reduce challenging behaviours to increase a person's quality of life.

Use of **verbal behavior and the principles of ABA** to work on:

- Language and communication
- Reducing challenging behaviours
- Self-help skills
- Play and social skills
- Pre-academic and academic skills

The intervention objectives are implemented through structured teaching and naturalistic teaching strategies. Services provided to individuals of **all ages** in a **1:1 format**.

Applied Behavior Analysis (ABA) - Adult Services

Uses evidence-based strategies to teach new and adaptive skills and reduce challenging behaviours to increase a person's quality of life.

Uses the **principles of ABA** to reduce challenging behaviours, increase communication and to teach activities for daily living skills (ADL)

- Personal hygiene
- Dressing
- Safety skills
- Meal preparation and eating
- Shopping
- Home maintenance

Services provided to individuals in the centre or community in a 1:1 format.

Early Start Denver Model (ESDM)

Based on Applied Behavior Analysis (ABA) and early childhood development methods.

Through **natural teaching**, your child is stimulated and supported in developing new skills in various areas, including:

- Communication
- Cognitive development
- Adaptive behaviors
- Social skills

The intervention objectives are implemented through playful activities. The services provided are for children from **12 to 60 months**, in **individual** or **group** sessions.
